

PRESS RELEASE

**SureView Systems Receives OnGuard Version 7.0 Factory Certification  
Under Lenel OpenAccess Alliance Program**

*SureView's Immix® software platform interfaces  
with Lenel®'s OnGuard® access control security system*

**Tampa, Fla., May 18, 2015** — [SureView Systems](#), a global provider of commercial central station and enterprise command center software, announced today that it has received Lenel factory certification for the latest version of OnGuard access control software, version 7.0, through the Lenel OpenAccess Alliance Program (OAAP). SureView's Immix® central station and command center software platforms interface with the OnGuard system to help end users gain a high level of situational awareness to enhance security.

SureView Systems has been a member of the Lenel OAAP since October 2006, and this latest evolution helps build on SureView's offerings to OnGuard system users. This new interface gives SureView the ability to conduct event management with the OnGuard system, as well as bring together customers' disparate security systems to be managed on a single, cloud-based platform.

"SureView Systems has completed required factory testing at Lenel to validate the functionality of its interface to the latest version of OnGuard, offering additional value to enterprise-class end users," said Gidon Lissai, Director of Strategic Alliances, Lenel. "We look forward to their continued involvement in the Lenel OpenAccess Alliance Program."

"The updated interface to Lenel's OnGuard system provides more flexibility to incorporate access control into the Immix platform," said Rob Hile, Director of Enterprise Command Centers, SureView Systems. "Lenel is a leader in the access control space, and we're excited about this new interface creating new opportunities with our existing and prospective customers."

Built on a cloud-based platform, open architecture, Immix delivers a platform to process and manage security events generated from any system or device, and is quickly becoming one of the most popular central management software platforms available. Its Web-based interface and minimal bandwidth requirements allow users to benefit from

ease of deployment and management while experiencing immediate and long-term return-on-investment. Furthermore, Immix supports the largest [integration library](#) in the industry, and is built upon proven, secure, scalable technology.

### **About SureView Systems**

SureView Systems is a global provider of command-and-control software for enterprise and central station environments. Its flagship solution, SureView Immix® is a comprehensive cloud-based software platform designed to integrate with multiple sensors, systems and devices to provide organizations with a comprehensive view of security profiles, risk management and business operations from a single, intuitive user interface. Immix is deployed successfully in a wide variety of environments including the central station, transportation, education and enterprise markets. SureView supports the largest integration library in the industry, enabling ease of deployment and system administration for a wide variety of organizations across the globe.
